// Who we are

Smart Fed Supply is a veteran-led federal supplier founded by **Philip A. McCulloch Jr., Sergeant, USMC (former)** — a **Silver Star** and **two-time Purple Heart** recipient — as its majority owner and sole managing member. We supply the categories that keep units fed, equipped and moving: subsistence and beverage, logistics and delivery, medical and first-aid, tactical and individual equipment, readiness training, and general supply / MRO.

// Core capabilities

- **Subsistence & Beverage** — performance and functional beverages, ration-adjacent goods, food-service supply for MWR, exchanges and commissaries.
- **Logistics & Delivery** — palletized and LTL freight to the ship-to address on the order, through licensed and insured motor carriers.
- **Medical & First-Aid** — field medical supplies, kits and consumables from qualified, compliant manufacturers.
- **Tactical & Individual Equipment** — gear, apparel and individual equipment from authorized sources, screened for TAA and Berry before quoting.
- **Readiness Training** — tactical medical and readiness training through partner instructor cadres; instructor credentials provided with every quote.
- **General Supply & MRO** — office, janitorial, industrial and hardware.

// Differentiators

- Veteran-led, with a leader who knows what the field actually needs.
- Compliance-first: every line screened for the Trade Agreements Act, the Berry Amendment and the nonmanufacturer rule before a quote is issued.
- Authorized channels only — we buy from authorized distributors and manufacturers.

// How to order

Send the line items or the solicitation → compliant quote → delivery FOB destination. Government purchase card up to the micro-purchase threshold; purchase order; Blanket Purchase Agreement.
